# QT Application Programmer

## Description

**QT Application Programmer**

Based just outside of Denver, Colorado, we are a growing video game developer that has shipped many console, mobile and PC titles. Our games have won numerous awards and been loved by players around the globe.  We are looking for an experienced QT programmer to join our tools team.  We are developing the next generation of storytelling and script writing tools and we want your help.

**Top Reasons to Work with Us**

You want the challenge of developing next-gen tools and pipeline

You want to join a veteran game studio and make amazing storytelling games

You want competitive pay and a great working environment

You want a fabulous office location at the base of the Rocky Mountains with an amazing mix of outdoor adventure and urban excitement

**What You Need for this Position**

3+ years QT C++ application development experience

**It Would be Great if You Also Had**

Cross platform developer experience Windows/Mac

C# programming experience

Serialization experience (JSON, Protocol Buffers, etc.)

**What's In It for You?**

Competitive salary

Generous PTO and holiday plan

Great working environment with a dynamic team

Exposure to consoles, VR and AR

Growth opportunities for your career

So, if you're an experienced QT programmer looking to work on a whole range of amazing tools and games, please apply today!

Please submit both a resume and cover letter when you apply.

Applicants must already be authorized to work in the U.S.
